-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 October 2006.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 17-39 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 17-39 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Notice to Applicant

1. This communication is in response to action filed 26 October 2006.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 17-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ibarra (6119097) in view of Eder (2001/0034628).

4. As per claim 17, Ibarra teaches a computer system, comprising:

An employee setup mechanism to create a database record for an employee (Ibarra; Abstract);

a data receive mechanism to receive data units from a given source and to store the received data units, the received data units as stored being associated with plural data unit types (Ibarra; Col. 5, lines 1-5 and Col. 6, lines 41-48);

Ibarra does not expressly teach:

a metric name input presenter preconfigured to present, on a computer screen, a metric name input field to receive from user input a flexible textual character term coining a name

Art Unit: 3626

for a custom performance metric to be defined; a data unit type input presenter preconfigured to present, on a computer screen, data unit type input fields corresponding to the new performance metric, to receive from user input selected type terms indicating select ones of the plural data unit types to be collected and used to formulate the custom performance metric; an operator input presenter preconfigured to present, on a computer screen, an operator input field to receive from user input at least one defined mathematical operation to be performed on received and stored data units associated with the selected type terms in the formulation of the custom performance metric; and a data association mechanism to associate the textual character term with the selected types and with the at least one defined mathematical operation.

However, these features are well known in the art as evidenced by Eder. In particular Eder teaches utilizing different valuation methodology (reads on “performance metric”; Eder; Pg. 3, Para. 27). Eder teaches an application database for storing user input, extracted information and system calculations (Eder; pg. 5, Para. 48). Eder further teaches a data dictionary window and prompting the user for any input required to define data fields (Eder; pg. 10, para. 82) It would have obvious to add these features to the method taught by Ibarra with the motivation of to provide information that would be useful in improving the business (Eder; Pg. 2, Para. 19).

5. As per claims 18-26 Ibarra does not expressly teach:

wherein the data receive mechanism comprises an integration engine;

Art Unit: 3626

wherein the data receive mechanism comprising an integration engine and a performance management system database;

wherein the data receive mechanism includes one or more application programming interfaces and an integration engine;

wherein the given source includes a source database;

wherein the given source further includes a structured database of workforce manager that can produce reports on employee performance;

wherein the given source comprises a source database of a third party system;

wherein the received data units are stored in a performance management database;

wherein the received data units are stored in a structured manner using one or more application programming interfaces;

• wherein the received data units are received in flat-file reports.

However, these features are well known in the art as evidenced by Eder. In particular Eder teaches a computer based human resource system where the databases, tables and files are accessed to complete a business valuation (Eder; Pg. 9, para. 74 and Table 11). It would have obvious to add these features to the method taught by Ibarra with the motivation of to provide information that would be useful in improving the business (Eder; Pg. 2, Para. 19).

As per claims 27-34 Ibarra does not expressly teach:

wherein the data configuration user interface comprises a configuration functions mechanism and a user interface;

Art Unit: 3626

wherein the data configuration user interface comprises a graphical user interface;

wherein the graphical user interface comprises a Windows[™] based interface;

further comprising a performance data user interface to receive performance data from personnel within an organization;

wherein the performance data user interface comprises an information management function mechanism and a user interface;

wherein the performance data user interface comprises a graphical user interface;

wherein the graphical user interface includes an HTML user interface;

wherein the performance data user interface receives performance data provided in real time via an HTML user interface in response to a request.

However, these features are well known in the art as evidenced by Eder. In particular Eder teaches a user-interface portion (Eder; Pg. 5; Para. 53) and connection via an interconnection network (Eder; Pg. 5, Para. 53). It would have obvious to add these features to the method taught by Ibarra with the motivation of to provide information that would be useful in improving the business (Eder; Pg. 2, Para. 19).

Claims 35-39 repeat limitations of claims 17-34 and the reasons for rejection are incorporated herein.

Response to Arguments

6. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3626

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michelle Linh-Giang Le whose telephone number is 571-272-8207. The examiner can normally be reached on 8:30 AM - 5PM, M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Thomas can be reached on 571-272-6776. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
